

Who Are We
and
Where Did We Come From?

We are the RMSAWWA and RMWEA

The water industry plays a significant role in history as it evolves in the Rocky Mountain West. We are driven by population growth, environmental and regulatory issues, resource development and a finite supply of water.

As a new addition to Rumbles, I invite all water and wastewater utilities, engineering firms, vendors and regulatory agencies to submit historical and/or biographical stories about their representative agency and the part they played in "How The West Was Won".

Jim Tallent
Rumbles Editor
